

Fracflow Consultants Inc.

**Environmental, Hydrogeological and
Geotechnical Engineering Consultants**

CIVIL / ENVIRONMENTAL / GEOTECHNICAL TECHNICIAN POSITION

Fracflow Consultants Inc., a hydrogeological, geotechnical and environmental engineering consulting firm requires an experienced Civil/Environmental/Geotechnical Technician for its **St. John's, NL office**. The successful applicant will provide support to existing and future projects in mine dewatering, potable water supply, environmental assessment, site remediation and geotechnical engineering projects. Ability and willingness to travel to local, national and international locations, including remote areas, is a requirement. Field assignments have the potential to range up to three or more weeks on a rotational basis.

The successful applicant will have a minimum of a three year diploma in the field of Civil/Environmental Engineering, Hydrological Sciences, or equivalent, from a recognized technical school or trades program, and should have a minimum of two (2) years of employment experience in the civil/environmental/geotechnical engineering field. The successful applicant will have a valid driver's license with a minimum of two (2) years of licensed driving experience and be able to provide a current and acceptable Driver's Abstract for insurance purposes; and will hold or have the ability to obtain a Canadian passport.

Salary will be commensurate with experience.

Please submit your application, including the names of three references and a copy of your transcripts, by Friday, September 8, 2017 to:
