Environmental, Hydrogeological and
Geotechnical Engineering Consultants

GENERAL MAINTENANCE, ENVIRONMENTAL AND GEOTECHNICAL TECHNICIAN POSITION

Fracflow Consultants Inc., a hydrogeological, geotechnical and environmental engineering consulting firm requires a General Maintenance, Environmental and Geotechnical Technician for its **St. John's, NL office**. The successful applicant, where work experience is required, will be provided on-the-job training to work in a technical support position which will require the successful applicant to learn how to maintain and operate company equipment such as Ground Penetrating Radar and borehole surveying equipment, to operate and service off-road vehicles such as tracked mounted Argos, small tractors, plus using and servicing borehole cameras, electric concrete coring drill equipment, a regular geotechnical drill rig with barge and boats, conduct routine soil and rock laboratory tests, etc., and provide other general property maintenance including storage and office building repairs. The ability to speak, read and write English at a minimum of a CLB-4 level is required to prepare field notes and tabulate data as required.

The successful applicant will provide general property and equipment maintenance and support to existing and future projects in mine dewatering, potable water supply, environmental assessment, site remediation and geotechnical investigations. Ability and willingness to travel to local, national and international locations, including remote areas, for periods of three or more weeks on a rotational basis is a requirement.

The successful applicant will have a valid driver's license that is acceptable to our insurance provider and will be a Canadian citizen or hold a work permit. Salary will be commensurate with experience.

All applications will be received by our head office location. Please submit your application, including the names of three references and any available educational documentation by Monday, May 1, 2023 to:
